TEAM NOTES & ANALYSIS

The following analysis from the State Navigate polling team examines the forces shaping this race.

CHAZ NUTTYCOMBE • ON VOTER IDEOLOGY

Hogan probably wins remaining undecided voters

Each candidate is performing equally among their respective ideological sections of the electorate. Egan has 95% of the vote among voters who are progressive/liberal/democratic socialist; Hogan has 93% of the vote among conservative/far right voters. While Egan has a 14-point lead among the ideological middle (center-left, moderate, and center-right voters), Hogan will likely win a majority of the remaining undecided voters (8% of the electorate). 3% of conservative/far right voters are undecided compared to 0% of progressive/liberal/democratic socialists, and 20% of center-right voters are undecided compared to 6% of center-left voters. The average undecided voter is center-right (a 4.3 on our ideological self-placement scale). Among center-right voters, Hogan holds 68% of the vote to Egan's 13%. In other words, Egan has consolidated her base very early, whereas Hogan still has work to do.
